Issue 3

September 2025

ISCEST Founding President Inducted into the Ghana Nigeria Hall of Achievers

The diplomatic relationship between Ghana and Nigeria is no secret to the people of both nations. The relationship tightened when the Ghana Nigeria Leadership Summit and Achievers Award (GNAA) was inaugurated in 2016. The 10th Ghana Nigeria Leadership Summit and Achievers Award (GNAA 2025) was organized by Ghana.. It was convened on Thursday, September 4, 2025, in Abuja, Nigeria.. The theme of the summit was *Bridging Borders, Rewarding Excellence: Sustaining the Diplomatic relationship between Ghana and Nigeria*. It was at this summit that Professor

Professor Steve Azaiki OON

Steve Azaiki OON was inducted into the Ghana Nigeria Hall of Achievers.

The numerous educational, cultural and societal contributions that Professor Azaiki have made over the years, have impacted local and national communities in significant and positive ways. Massive congratulations to the ISCEST Founding President! (See pages 8 & 9 for some moments from the occasion).

Publish Your Research Paper in CSCEST!

Current Studies in Comparative Education, Science and Technology (CSCEST) is ISCEST's Official Journal. The journal promotes interdisciplinary studies in education, science and technology. It publishes original research and papers that discuss, analyse or evaluate policies, or those that disclose relevant gaps in existing research. For more information on paper submission please visit <http://www.journal.iscest.org/>.

A Prestigious Invitation! (Connected to Page 1)

GHANA NIGERIA ACHIEVERS
AWARD FOUNDATION

PROF. STEVE AZAIKI, OON
FOUNDER, AZAIKIFOUNDATION

Dear Sir,

**INVITATION TO RECEIVE THE 2025 OUSTANDING LEADERSHIP
AWARD/INAUGURATION AS PATRON FOR GNAA AT THE 10TH
GHANA NIGERIA LEADERSHIP SUMMIT/ACHIEVERS AWARD IN
ABUJA- NIGERIA**

GHANA NIGERIA ACHIEVERS AWARD FOUNDATION (GNAA) is a group that have continuously played its part in strengthening the relationship between Ghana and Nigeria through honoring deserving companies or individuals who are making impact in society.

Through the establishment of the Ghana Nigeria Leadership Summit/ Achievers Award in 2015, lives have been touched consistently through our different initiatives aimed at creating a platform where men and women of integrity can come together to bond and share ideas for the development of the African continent.

We commend your consistent commitment to Humanity, love for Education, passion for hard work, humility and contributions to uplifting lives through your foundation. You have remained a passionate supporter of positive initiatives, dedicated, committed, determined and sincere in your quest for a better country. As one of our greatest supporters, we would continue to celebrate your dedication to our vision.

We invite you to the **10TH GHANA NIGERIA LEADERSHIP SUMMIT/ ACHIEVERS AWARD (GNAA 2025)** under the Theme — **'BRIDGING BORDERS, REWARDING EXCELLENCE: SUSTAINING THE DIPLOMATIC RELATIONSHIP BETWEEN GHANA AND NIGEIRA'**. The date for this prestigious global event is Thursday 4th September, 2025 at the Barcelona Hotel, Wuse 2— Abuja from 4pm (Red carpet).

Diplomats, CEO's of Organizations, international media houses and corporate Leaders would be attending as is usual with past editions. You would be inducted into the **GHANA NIGERIA HALL OF GREAT ACHIEVERS**. Our team would be glad to kindly receive your brief profile and recent picture for social media publicity as we look forward to your support as always.

Hoping for a positive response

Profiling Professor Blessing Minaopunye Onyegeme-Okerenta

Prof. (Mrs.) Blessing Minaopunye Onyegeme-Okerenta is a Nigerian by birth and hails from Bonny Island in the Niger Delta Region. She has a PhD in Biochemistry from the prestigious University of Lagos, Nigeria. She is a Professor of Biochemistry and Toxicology at the University of Port Harcourt, Rivers State, Nigeria. Her research focuses on Medical Biochemistry and Environmental Toxicology. Her primary areas of interest include evaluation of phytomolecules present in medicinal plants for anticancer, antidiabetic, hypolipidemic, antisickling, antiplasmodial, and anti-inflammatory properties, as well as the analysis of plant and fungi extracts for antiprotease

and antimicrobial properties, with the view to producing natural and cost-effective therapeutic agents, while her other interests include biotransformation of environmental agricultural wastes to viable products such as enzymes, simple sugars, bioethanol and animal feed formulation, production of microbial biosurfactants for degradation and remediation of hydrocarbon pollutants, environmental and molecular toxicology. Her current projects range from chloramphenicol-induced lymphoma and testosterone-based drug-induced prostatitis and ameliorative potentials of some medicinal plants in animal models to evaluation of the risk of various toxins to the ecosystem and human health in multimedia. She has over eighty peer-reviewed publications, in different fields of Biochemistry, in both local and international journals.

Prof. B. M. Onyegeme-Okerenta is married to Engr. Emenike Onyegeme-Okerenta and they are blessed with four wonderful children between the ages of 24 and 33 who are excelling in their various fields of endeavour.

A Special Feature Article!

Nutraceutical Potential of Banana Flower Petals as Antioxidant and Anti-inflammatory Agents

Prof. Godwin Isitor, DVM, MS, PhD, FISCEST

Ugo Resorts and Health Farms Ltd, Ekwuoma, Ika NE LGA, Delta State, Nigeria

Prof. Godwin Isitor

Summary

Banana (*Musa spp.*) flower petals, often discarded as agricultural waste, are increasingly recognized as potent natural supplements with significant antioxidant and anti-inflammatory properties. Rich in phytochemicals such as eugenol, quercetin, and other flavonoids, these petals offer a safe and effective alternative or complement to conventional pharmaceutical products. Their bioactive compounds contribute to oxidative stress reduction, immune modulation, metabolic regulation, and overall health promotion. This paper explores the preparation, consumption, indications, and safety considerations of banana flower petals as a functional health supplement.

Introduction

Oxidative stress and chronic inflammation are central to the development of many degenerative diseases, including cardiovascular disorders, diabetes, arthritis, and neurodegenerative conditions. While synthetic antioxidants and anti-inflammatory agents are widely used, they often carry side effects and long-term risks.

Banana flower petals represent a natural, accessible, and cost-effective alternative. They contain a rich profile of bioactive constituents — notably eugenol, quercetin, kaempferol, and other flavonoids — which collectively act as free radical scavengers and modulators of inflammatory pathways. Additionally, these petals are abundant in dietary fiber, essential minerals (such as potassium and magnesium), and polyphenols, contributing to their wide-ranging health benefits.

Preparation Methods

Banana flower petals can be prepared for consumption through several simple methods that preserve their bioactive potency:

Cont'd from Page 4

Fig. 1. Typical banana flower showing attached petals and emerging fruits. Simply collect one or more of the fallen petals and prepare as desired.

1. Infusion (Tea): Fresh or dried petals are steeped in hot water for 10–15 minutes. This gentle extraction retains eugenol and flavonoids for direct absorption.
2. Decoction: Petals are simmered for 20–30 minutes to extract deeper phytochemicals. The resulting liquid is filtered and consumed warm.
3. Powder Form: Dried petals are ground into a fine powder. The powder can be encapsulated or added to smoothies, soups, or drinks.

4. Culinary Incorporation: Tender petals may be cooked as part of stews, stir-fries, or salads to deliver their nutritional benefits as part of daily meals.

Consumption Methods

- Daily Infusion: 1 cup of banana petal tea once or twice daily for general antioxidant support.
- Powder Supplement: 1–2 teaspoons mixed into food or drinks.
- Culinary Use: Regular inclusion in meals enhances nutrient intake naturally.

Consistency is key — long-term, moderate consumption is more beneficial than occasional high doses.

Indications

Banana flower petal supplements are beneficial in the following contexts:

- Oxidative Stress Management: Neutralizes free radicals, slowing cellular aging and reducing chronic disease risk.
- Anti-inflammatory Support: Eugenol and flavonoids modulate inflammatory mediators, beneficial in arthritis, metabolic syndrome, and cardiovascular conditions.
- Metabolic Health: Improves insulin sensitivity and may aid in glycemic control.
- Reproductive and Hormonal Health: Traditionally used to regulate menstrual cycles and alleviate menstrual discomfort.
- Digestive Health: High fiber content supports gut function and detoxification.

Dear Prince Nornubari Barika,

NOTIFICATION FOR AWARD OF SCHOLARSHIP

We are pleased to inform you that, having met the PTDF advertised criteria and scaled through the screening processes, you have been awarded a PTDF scholarship with the following details:

Academic Session: 2025/2026

Strategic Partnership: PTDF partner Schools in Germany/France/Malaysia

Scholarship: Full Scholarship Covering Tuition and allowances for living expenses and accommodation.

Congratulations and best regards!

PTDF Scholarship Team

- Clay P Bedford.*

Some Moments from A Prestigious Occasion - From Page I

The award was presented on behalf of the organizers by Her Excellency, Tenewa Asamoah , Acting High Commissioner of Ghana to Nigeria

Continued from Page 8

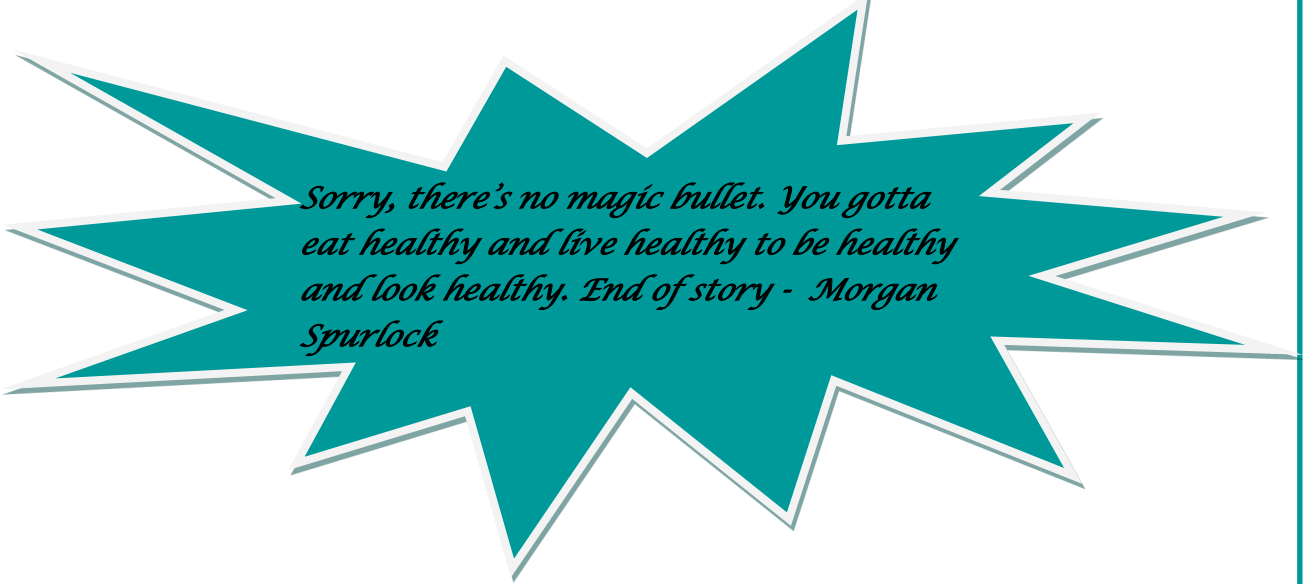

Cont'd from Page 5**Contraindications**

While generally safe, certain precautions are advised:

- Allergies: Individuals allergic to banana or related plants should avoid use.
- Pregnancy and Lactation: Consult a healthcare professional before use, as limited data exist on concentrated extracts.
- Drug Interactions: Potential interactions with anticoagulants or anti-diabetic medications should be monitored.
- Excessive Consumption: Overuse may lead to gastrointestinal discomfort due to high fiber and tannin content.

A Reminder from ISCEST's President

The International Society of Comparative Education, Science and Technology (ISCEST) is convening its XII Annual International Conference from 01 December to 03 December 2025. The conference will be presented as a hybrid event to allow those who are unable to attend in person, to still participate. The theme for this year's conference is **Promoting Comparative Education, Science and Technology in the 4th Industrial Revolution**. Academics, researchers, teachers, students, consultants, policy makers, curriculum developers and other interested professionals are invited to participate. Here are some of the themes:

Professor Matthew Wegwu

Education

Using technology in the early years
Preparing teachers for Industry 4.0

Agriculture and Environmental Sciences

Technology utilisation in farming techniques
Using technology in environmental science approaches

Engineering Science and Technology

AI in primary and secondary schools
Analytics and connectivity factors that hinder or promote the delivery of engineering science and technology

Let's all
Participate!

Words of Thanks!

Words of thanks are due to you

For the invaluable support you give

May our partnership continue to grow

From strength to strength each day we live

Gertrude Shotte
